

Changing lives of many!

Zayda Shah, a resident of Shanti Nagar in Pimpri-Chinchwad lives with her family comprising of total six members- her four daughters, her husband and herself.

Lack of household sanitation facility was posing as the biggest problem for her four daughters and herself. One of her daughters had also been facing Urinary Tract Infection due to which they had been spending heavily on her treatment. Having to defecate in the open, they would all be subjected to such challenging situations, especially in the monsoons.

With such a financial crunch at their end, getting a toilet constructed was nearly impossible. Fortunately, around the same time, SA commenced its work in this settlement. Provision of construction materials at the door step of beneficiaries was a big incentive, accelerating their interest to avail this initiative. They readily agreed to get a household toilet constructed and availed loans to do the same. In no time, their toilet stood ready and they were blessed to have it. The daughters were relieved the most and seeing them happy, the parents were more than content!

Making lives more meaningful for the adolescents!
