

Facilitating ease and comfort: mentally & physically

Changdev Kamble hailing from Solapur, moved to Mumbai around 35 years back in search of employment.

He has been staying in the settlement of Nocil naka in Navi Mumbai along with his family comprising of his wife and two daughters.

He would very responsibly undertake all kinds of work and hardships to earn enough to support his family financially.

Unfortunately, back in the year 2014, he met with an accident leaving his leg fractured. Initially he and his wife, both failed to realise the gravity of the situation. But soon enough it kept aggravating and he had to undergo repetitive surgeries, yet these yielded no positive results.

For the 6th time, they approached a reputed doctors at DY Patil hospital in Navi Mumbai and spent over Rs. 1.5 lakhs on the surgery and a metal rod was inserted in his leg.

This led to him limping around and being unable to walk straight without some support.

Changdev's constructed toilet

With such a terrible problem, even the thought of him having to walk upto the community toilet block across the road was a task. Getting there, waiting in queues for his turn and then squatting in such a condition was close to impossible for him.

Hence he was very prompt in approaching SA to get facilitated with a household toilet at the earliest. He is very grateful to SA for having eased his difficulties and this has been more than a blessing to him.
