

# Kolhapur Toilet Block Inauguration

On January 8, 2008, the SMKMC and local officials inaugurated the new Kolhapur toilet block in the city of Miraj. This project reaches out to over 135 families, and provides five stalls for both men and women, with an attached children section located within the ladies area. All families who use the toilets are charged a minimum monthly fee for services, which go to insure upkeep and maintenance. This is also our second project in the SMKMC, which incorporates a Biogas facility that generates enough gas to sustain the caretaker's daily needs, who resides on the first floor.
